Summary

A highly skilled and accomplished UI developer with 9+ years of experience, adept at creating visually appealing and user-friendly interfaces for web and mobile applications. Proven expertise in front-end technologies, including HTML5, CSS3, JavaScript, and various modern frameworks such as React, Angular. Demonstrated ability to translate design concepts into responsive and interactive user interfaces, ensuring a seamless user experience.

Key Skills

- **Front-end Development:** Extensive experience in developing dynamic and responsive user interfaces using HTML5, CSS3, and JavaScript.
- **Framework Proficiency:** Advanced proficiency in popular front-end frameworks such as React, Angular with a deep understanding of their architectures and best practices.
- **Cross-Browser Compatibility:** Adept at ensuring consistent user experiences across different browsers and devices through thorough testing and optimization.
- **User Experience (UX) Design:** Strong understanding of UX principles, collaborating closely with designers to implement intuitive and engaging user interfaces.
- **Responsive Design:** Expertise in designing and implementing responsive layouts to provide an optimal viewing experience on various devices.
- **Performance Optimization:** Proven track record of optimizing front-end performance through efficient coding practices.
- **Version Control:** Proficient in using version control systems, such as Git, for collaborative development and code management.
- **Testing and Debugging:** Thorough knowledge of testing methodologies and debugging techniques to ensure the delivery of high-quality, bug-free code.
- **Collaboration and Communication:** Strong communication skills and the ability to collaborate effectively with cross-functional teams, including designers, backend developers, and other stakeholders.
- **Adaptability:** Demonstrated ability to adapt to new technologies and frameworks, staying current with industry trends and best practices.

Professional Accomplishments

- Successfully delivered numerous web and mobile projects, meeting or exceeding client expectations.
- Collaborated with cross-functional teams to achieve seamless integration of front-end and back-end systems.
- Played a key role in optimizing website performance, resulting in improved page load times and user satisfaction.
- Actively participated in code reviews, and contributed to the continuous improvement of development processes.
- With a passion for creating innovative and visually appealing user interfaces, I am dedicated to staying at the forefront of UI development trends and technologies to deliver cutting-edge solutions.

Experience

TCS, UI Developer 2021 - 2023

Project Title: StoreFrontRefresh

Project Overview:

Our StoreFrontRefresh is a modern web application built using React, designed to Communicate with different system. The platform provides an intuitive and user-friendly interface, allowing users to place and enquire about the products effortlessly.

Tech Stack:

Frontend: React,, React Router for navigation.

Styling: Styled Components for modular and maintainable CSS.

Backend: .Net and Express for server-side logic.

Database: SQL for efficient data storage

Development Methodology:

- The project follows an Agile development methodology, with regular sprints and iterative releases.
- Continuous integration and deployment ensure a stable and up-to-date application.

Spadeworx Software , UI Developer 2016- 2021

Project Title: Equinix Hub

Project Overview:

Equinix Hub is a web application built using Angular and frontend technology, designed to display the system data. The platform provides an intuitive and user-friendly interface, allowing users to search the details effortlessly.

Tech Stack:

Frontend: Angular ,HTML .CSS, Bootstrap Javascript.

Styling: Styled Components for modular and maintainable CSS.

Backend: Sharepoint .

Development Methodology:

- The project follows an Agile development methodology, with regular sprints and iterative releases.
- Continuous integration and deployment ensure a stable and up-to-date application.

Karma Solutions Inc, UI Developer 2014 - 2016

Project:Timesheet

Responsibilities:

- Applies significant knowledge of industry trends and developments to improve quality and performance
- Collaborates with developers to implement solutions, resolve problems and perform code reviews
- Develop, extend, and maintain our user interface (UI) component library and front end framework
- Ensuring excellent practices are utilized in delivering UI Management and Integration Solutions
- Produce UI component specifications for development
- Work both independently and collaboratively with front and back end development teams on multiple projects

Education

Bachelor of Engineering (I.T)
